Introduction

The data in this report are the number of crimes reported by all Connecticut law enforcement agencies to the Crimes Analysis Unit, Division of State Police, Department of Emergency Services and Public Protection, as part of the Uniform Crime Reporting program of the Federal Bureau of Investigations (FBI) by the date noted on the cover page of this report. The data can be found at ct.beyond2020.com/.

The number of crimes is calculated using the FBI's units of count. If the offense is a Crime Against Persons, then the count is set to the number of victims. If the offense is a Crime Against Property, then the count is set to one crime per distinct operation unless the offense is Motor Vehicle Theft, then the count is set to attempted Motor Vehicle Thefts plus the number of Stolen Motor Vehicles. If the offense is a Crime Against Society, the count is set to one crime per occurrence.

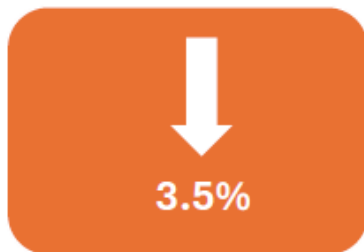

All crimes are classified based on law enforcement investigation in accordance with the National Incident-Based Reporting System (NIBRS) offense definitions and are not necessarily identical to the Connecticut General Statutes Penal Code or local ordinances. NIBRS divides offenses into two categories, Group A Offenses and Group B Arrest-Only Offenses. Group A Offenses are considered more consequential offenses and are reported whether an arrest is made or not. Group B Offenses are only reported when an arrest is made.

The definition for Rape was revised by the FBI in 2023 to include the offenses of Sodomy and Sexual Assault with an Object. Those offenses along with Rape have been rolled into Rape (2023 revised) to accommodate the change. Human Trafficking, Gambling, and Prostitution crimes have been aggregated as well as they occur in low numbers.

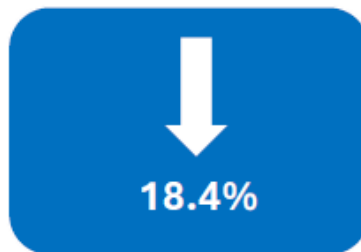

Data for 2024 are preliminary as reports that have not passed FBI audits for completeness or accuracy are not included
